

**PARENTS and Caregivers
of CHILDREN with PRADER-WILLI
SYNDROME, WE WANT TO
HEAR FROM YOU!**

***What is it
really like to raise
a child with PWS?
We want to know!***

Parents and caregivers of children with Prader-Willi Syndrome (ages 5 to 12) are needed to participate in a research study on caring for and parenting these children.

In this study, adults will be interviewed 3 times over a 6 month period and will be asked questions about personal and family health, family history and routines and what it is like to live everyday caring for a child with PWS.

Parents (only) will also have the opportunity to take part in a family observation visit where the researcher will join the family to see them as they share an ordinary activity (of their choosing) together.

Saint Louis University IRB # 27596
Approved 02-20-2017, Board # 1
